

Theatre Royal Norwich Inflatables

Mini Beanstalk

The Mini Beanstalk is a single inflatable unit blown up by a single fan running of a 16A Cee form plug (this can be converted down to a 13A or 15A supply). Inflation time is approximately 10 seconds. The effect is freestanding when inflated.

The Mini Beanstalk is best preset inflated behind a groundrow (NOT SUPPLIED) to represent the “Top of the Beanstalk”. The beanstalk is inflated via a supply tube at the base of the beanstalk running to the fan. This can be located at stage level or routed through a trap from a substage area. The supply tube is 1500mm long

**Height 3000mm
Width at base 800mm
Width at widest point 1400mm
Hose length from fan 1500mm**
